

**Bonal International, Inc. Announces
35.7% Increase in Net Revenue at Six Months**

ROYAL OAK, Mich., October, 2005

Bonal International, Inc. (OTC: BONL) today announced the results for the sixth month period ending September 30. Bonal recorded a 35.7% increase in net revenue of \$918,035 in 2005 compared to \$676,759 at the same time last year. Income before federal income taxes was \$217,593 versus \$134,440 last year, representing a 62% increase in profit. Net income after tax is \$152,593 versus \$105,440 last year, an increase of 44.7%.

Unit sales volume has seen a 79% increase due to an increased volume of lower priced units sold in the first half of the year compared to last year in same six month period.

Foreign sales are continuing to be strong at 38.5% of unit volume.

"Our subsidiary, Bonal Technologies is continuing to grow in both US and foreign sales. We are happy with our results," said A. George Hebel, III, chairman of Bonal International. "We're also pleased to report that our new products Black Magic(R), for distortion control, and Pulse Puddle Arc Welding(R) are continuing to represent a good portion of our growth."
